We provide nutritional information about the foods they eat on a daily basis. Thereby providing fitness to the masses and assisting them in staying healthy.

The main cause of this problem is a lack of nutrition. Improper nutrition and a lack of regular exercise create a number of diseases. making it difficult to live a healthy life.

Customers that have health care, dietary, or fitness concerns will be listed in the chatbox. When you first log in. Customers contribute information about their health state. A solution will be provided after an analysis of the

customer's situation.

3. TRIGGERS

The customer will be driven to utilise our application after continual advertising of our

application and hearing feedback from their friends and neighbours.

Calories tracking is a key component in all fitness programmes that aids in illness prevention, so regular people can utilise it. The instructor displays the specific fruits calories and offers guided guidance so that the users may execute them correctly.

The programme is accessed by scanning the fruit and providing nutritional information.

8.2 OFFLINE

8.1 ONLINE

The user will perform physical activities based on the nutritional information.

4. EMOTIONS: BEFORE / AFTER

Customers would experience insecurity and poor

health prior to using our application. Customers that use our application report improved health and increased self-motivation.
